

Interventions

Transformations works with the nation's leading interventionists to give families, friends, colleagues and others the ability to help reluctant addiction sufferers get treatment. Interventionists help individuals acknowledge their disease, understand the harm caused to themselves and others, and define a clear path towards help and recovery.

Detox

For many people entering addiction treatment, detoxification is a necessary first step. Addictions to opioids, heroin, alcohol, and other substances require medically- assisted detoxification to manage the symptoms of chemical dependency withdrawal and stabilize clients for further treatment.

Residences

Living options at Transformations include two-bedroom condominiums that feature private bed and bathrooms, a full-sized kitchen, as well as a washer and dryer. There is also a family-style villa where bedrooms are shared. The residences are located close to beaches and shopping, and transportation to treatment at the clinical center is provided.

Alumni and Aftercare Programs

We believe that maintaining a relationship with our many alumni can help reduce the occurrence and severity of relapse and remind people that they can have a fun and fulfilling life in recovery. The dedicated Transformations Alumni Services team makes phone calls to every alumni member indefinitely. When speaking with former clients, alumni coordinators work to ensure open lines of communication and determine if clients are maintaining a healthy, sober lifestyle. In many cases, these touch-points prove instrumental in helping people stay sober or return to treatment rather than relapsing.

RESTORING HOPE.
CREATING PURPOSE.
CHANGING LIVES.

TREATMENT CENTER

SUBSTANCE ABUSE & MENTAL HEALTH

www.transformationtreatment.center

As a nationally recognized substance abuse and mental health treatment center, we integrate natural and holistic protocols along with traditional medications and personalized care. At Transformations, we can help you live the life you deserve.

We specialize in individualized, thoughtful, and supportive programs that are geared toward every client's specific needs. We provide the right foundation and aftercare services needed in order to help our clients get healthy and stay healthy.

This is where healing begins, where relationships are repaired, and where life becomes fun again.

Programs

The multiple programs we offer at Transformations ensure that treatment takes place in an environment that is most conducive to healing, where there is interaction with peers of similar life experiences, and where our clients have access to the most relevant and effective therapies. All programs are staffed by a team of experienced, licensed clinicians and supporting staff.

Adults 30 Years of Age and Above

Adults over 30 tend to share the experiences and stresses of the workplace, marriage or long-term relationships, children and families, social and civic responsibilities, legal issues, and more. Older adults tend to be more emotionally mature than younger people and may be able to better support and manage their own recovery.

Young Adults

Young adults between 18 and 29 years of age tend to lack the emotional maturity and life experience of older adults. Addiction may have cut short their paths to education, careers, or relationships.

Mental Health

There is no shame in recognizing that you need help and it's important for you to know that you're not alone. The right treatment program and the proper support can help you make a lasting recovery. We accept clients struggling with their mental health for Partial Hospitalization Programs (PHP) and Intensive Outpatient Programs (IOP).

Help For Our Heroes

Addressing addiction in veterans and first responders requires a deep understanding of the unique challenges of their work and the effects it has on their lives. These stresses, in addition to unaddressed post-traumatic stress disorder, increase the risks of substance abuse, depression, and suicide.

SoundPath Recovery

The power of music is truly incredible. The mission of our SoundPath music program is to help our clients channel their creativity and express their emotions in a place that is free from judgment, while teaching them healthy coping skills in recovery through the art of music expression.

Christian Faith

Spirituality and faith can be powerful allies in recovery. The Christian and faith-based program employs Masters Level Christian therapists who are experts in combining treatment with Christian principles and spiritually-based 12-Step work. Transformations also takes part in the renowned Celebrate Recovery program, as well as offers baptisms, church services and prayer groups in the Transformations on-site chapel.

Jewish Faith

The Jewish/Faith-based program at Transformations Treatment Center offers evidence-based treatment that respects Jewish core values, traditions, and principles. We are committed to providing culturally and spiritually sensitive treatment for Jewish individuals confronting substance abuse and mental health disorders.
