

family
matters

Addiction and mental health issues can take an enormous toll on friends, loved ones, and relationships. Transformations, as part of our Family Matters program, offers a weekend of therapy, education, and healing for family, friends, and clients. Addiction and mental health disorders are family diseases. We are here to help start the process to repair and heal the whole family.

In an effort to further address drug and alcohol addiction and mental health disorders, we recognize the importance of engaging family members. We understand the need for families to be heard at all levels of the treatment and recovery process. In doing so we will reduce the percentage of individuals leaving treatment without the best possible post-treatment plan in place.

A Program for Families

Our goal is to empower clients and families to achieve sustained recovery and optimal mental health, leading to happy and purposeful lives. Our family outreach services include:

- Real-time support by text and phone from a trained professional
- Regular family check-ins
- Family conference calls supporting recovery and addressing relapse
- Help in planning, guidance, and boundary setting
- Ongoing support as needed

We are a nationally licensed and accredited treatment center in Florida.
